SKILLS

- Java
- Spring -Boot, MVC, Struts
- JDBC, Hibernate, JPA
- Angular
- Servlets/JSP, REST, SOAP
- JavaScript, TypeScript, jQuery
- HTML, CSS, Bootstrap
- Microservices, Agile
- AWS
- Redis, Apache Kafka
- Docker, Kubernetes
- MySQL/MariaDB, OracleDB
- SQL Server, Oracle,MariaDB
- Maven, Gradle, ANT
- Junit, Mockito, SonarQube
- Git, SVN, Github, Bitbucket
- Jenkins, JIRA
- Tomcat, Wildfly,
- AutoSys, IIS
- GCP, Digital Ocean
- Windows and IOS
- PCF,OCP,ACP

LANGUAGES

- English
- Hindi

PROFESSIONAL OVERVIEW

I am a Full Stack Software Engineer driven by the challenge of building scalable, user-centric applications that solve real-world problems. With over **6+ years** of experience, I specialize in both backend and frontend turning complex requirements into seamless digital experiences.

WORK EXPERIENCE (6.11 YEARS)

Senior Software Engineer

DBS Tech India — Nov 2022 - Present

- Designed and developed performance-driven, user-centric banking applications from scratch utilizing Angular for the frontend and Java / Spring Boot microservices for the backend.
- Reduced dynamic file processing and generation jobs runtime from 2+ Hours to less than 30 minutes by utilizing Spring Batch and java multithreading.
- Designed data models and developed a global financial projection application from the ground up for Global Bank Customers.
- Built a custom UI-based S3 Explorer application featuring a strict access control matrix, seamlessly rendering and managing more than 1 TB of object data across multiple buckets.
- Automated critical monthly banking compliance systems by developing automated processing engines for Non-Performing Assets (NPA) and Section 35 (S35) regulatory reports.
- Authored generic libraries and custom Java annotations adopted bank-wide, drastically reducing boilerplate code for internal engineering teams.
- Successfully migrated legacy enterprise workloads from PCF to OCP while driving automated Jenkins CI/CD pipeline optimizations.

Tech: **Java, Spring Boot, MySql, MariaDB, AWS, Docker, Kubernetes, Angular, Python, tomcat.**

Software Engineer

Ebix Ind Pvt Ltd. — Feb 2020 - Nov 2022

- Programmed and deployed full-stack product integrations, building custom configurations and data-mapping layers for Bank of America, Allstate, Manulife.
- Developed robust backend microservices and optimized high-throughput communication interfaces connecting the core product engine to external client applications.
- Debugged complex runtime exceptions in live environments, writing hotfixes and optimizing Java code performance to maintain maximum platform uptime.

Tech: **Java, Spring Boot, Spring MVC, JSP, Java Script, jBoss, wildfly, postman.**

Software Developer

Karvy Data Management System Pvt Ltd. — May 2019 - Feb 2020

- Designed relational data models and built secure Java RESTful microservices from scratch to handle seamless data integration across systems.
- Programmed a secure enterprise Document Management System (DMS) and an automated employee attendance portal using Java frameworks.
- Developed a high-performance backend processing engine for a real-time merchandise tracking and logistics application

EDUCATION

Master's Degree: Pondicherry Central University, MCA – 2018, 7.61 CGPA
